

LYNX® DRIVE CENTRAL CONTROL SYSTEM

Lynx® Drive is a mobile optimized irrigation control platform designed specifically for golf course superintendents. With intuitive navigation and real-time access to diagnostics, mapping, and system controls, it empowers users to make informed decisions directly from the field. Lynx Drive ensures the entire crew is informed, minimizing delays and eliminating guesswork. Features like Smart Notes™ provide immediate communication with detailed notes, photos and team transparency with notes history for up to one year for easy reference. Integrated data-rich maps and precision irrigation tools ensure efficient, responsive course management—anytime, anywhere.

FEATURES & BENEFITS

Centralized Irrigation Management

- All the Lynx essentials are at your fingertips, reimagined to work beautifully on your mobile device
- NEW Lynx Smart Notes make it easy to track what needs to be done and communicate with your staff
- Use Simultaneous Stations in the app to turn on a group of stations at one time for a quick syringe
- Make changes right from the map. There's no need to go to a different screen

Stay Connected With The Team

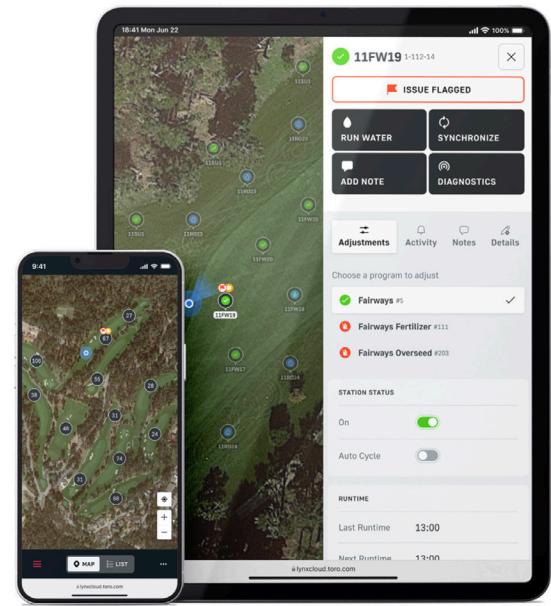

- New Smart Notes so you can add notes to stations that include who added the notes and add up to 4 pictures for each note
- Smart Notes complement flags to capture why a station is flagged and keep track of work done on each station
- View Smart Notes for the past 7 days using Lynx Drive app or up to one year at your desktop

Streamlined and Intuitive design

- Filter buttons so you can get to the information you need quickly
- All your watering needs in one place so you can quickly schedule your irrigation
- Bidirectional map so you can select stations from a list or directly from the map

Designed for Mobility

- App designed for phones and tablets – coming to iOS and Android in late Summer 2025
- Turn station(s) ON by time or amount from the map or from a list
- Adjust sprinkler, nozzle or arc settings
- Schedule watering using the app
- Stay connected with the team using Smart Notes and Flags and by viewing Activities
