

# FieldCombo™ 770

SYNTHETIC TURF GROOMER

## FEATURES

- Superior Decompacting of Synthetic Turf Fields – *decompact infill, incorporate infill or lightly groom the field surface; or complete all three tasks in a single pass*
- Multiple Brush Attachment Options – *angled in, angled out or all straight to achieve the results you desire*
- Modular Design – *easily remove brush assembly if desired*
- Spring Tine Depth Set By Field Manager – *provides consistent results, not reliant on tow vehicle setting*
- Large Working Width – *77" (195.5 cm) for efficient operation, and can be easily towed by most tractors or utility vehicles*

## The One Tool For All Your Synthetic Turf Grooming Needs.

To brush, loosen and decompact the hardest infill, the Bullseye FieldCombo 770 is equipped with a variety of customizable tools to meet your needs. Two rows of steel spring tines gently lift and break up compacted areas while effectively mixing and softening any infill material. Used separately with spring tines raised, or in combination, the rear poly-brushes straighten and lift the turf fibers leaving them plush and upright for an improved playing surface and an exceptional field appearance. An optional magnet adds to its functionality and quickly installed drawbar kit allows even more tow vehicle options.
