

The world's premier courses trust
Lynx[®] Smart Module

toro.com/golf

“It’s really simple. Our new Toro Irrigation system gives us the ability to more precisely apply water where we want it and keep water out of areas we don’t want it. That is inherently going to allow us to produce better turf conditions and better playability.”

Mike McCormick

Superintendent | Oakmont Country Club

Oakmont Country Club, Oakmont, PA | Site of the 2025 U.S. Open

“The support system with Toro is really remarkable. Having that backbone, foundation, and support system is really what made the decision to go Toro so easy.”

Mike McCormick

Superintendent | Oakmont Country Club

LYNX[®] SMART MODULE

Smart sprinkler technology for Toro Lynx 2-Wire systems that gives you precision control. Developed with the needs of golf course superintendents in mind and based on decades of engineering experience, it delivers high speed diagnostics using rapid two-way communications.

Precision Water Management: Enjoy the confidence that comes from knowing your golf course is receiving exactly the right amount of water. The precision control minimizes water waste and ensures optimal turf health, protecting your course against the risks of over- or under-watering.

Efficiency Through Remote Control and Monitoring: Save valuable hours with the ability to manage and monitor your irrigation system remotely. This convenience allows you to adjust settings and respond to conditions from anywhere, freeing up time to focus on other critical tasks.

Time Savings with Alerts and Notifications: Stay ahead of potential issues with real-time alerts and notifications about your irrigation system. Quick notifications about any discrepancies or failures allow for swift action, saving you time and reducing the need for extensive troubleshooting.

Enhanced Control Through Resource Efficiency: Relax with the knowledge that your irrigation practices are as efficient as possible, reducing both environmental impact and operational costs. This efficiency not only preserves essential resources but also secures the financial health of the golf course.

Durability through best-in-class lightning and surge protection. Oversized components, with duplicate backups, prevent system from downtime.
