Versatile. Flexible. Reliable. The Toro® 570Z sprinkler embodies all that is required for residential and service contractors wanting to stock just one sprinkler family.

Features & Benefits

Zero Flush Wiper Seal

Prevents flushing on pop-up, allowing more sprinklers on the same line.

One-Piece Check Valve

Easily installed at the factory or in the field. Maintains up to 3m (10') elevation change.

Low Pressure or Enhanced Retraction Spring

Choose the spring which best meets your site specific needs. New to the family is the low pressure 570ZLP which allows for pop-up and retraction at lower pressures.

Ratcheting Riser

For easy and reliable arc adjustment on pop-up models.

Small 50mm (2") Diameter Cap

Less visible, reducing damage from exposure or vandals.

*Enhanced Zero
Flush Seal*

Water Management Highlight

No Flushing on Pop-Up!

With a pressure-activated wiper seal that flushes only upon retraction, flow-by is eliminated on pop-up reducing water waste and allowing more heads per valve. This zero-flush seal is what makes the 570Z Series a spray head for those serious about effective water management.
